To: Concrete Producer
From: Jim Ripley (Turtle Tanks)
Re: Local Manufacture of Septic Tanks

Concrete Needed

Dear Concrete Producer,

Turtle Tanks has developed a process for making high quality, lightweight concrete tanks using a **STANDARD CONCRETE TRUCK**. We would like to explore the possibility of having concrete septic tanks manufactured by **YOUR COMPANY** to service demand of the local market. At our primary plant we use a **MOBILE CONCRETE MIXER TRUCK** for making tanks which works quite well. We wish to have 10 satellite plants to service the whole BC market. Current government regulations allow our company to manufacture tanks at any facility that can provide 32 MPa concrete. If we reach an agreement, our unit cost paid to you would include your supply of:

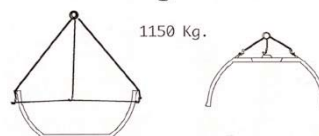

Concrete / Labour / Yardspace / Loading on Delivery Truck

We would supply forms, accessories, and training. The tanks nest using minimal storage space.

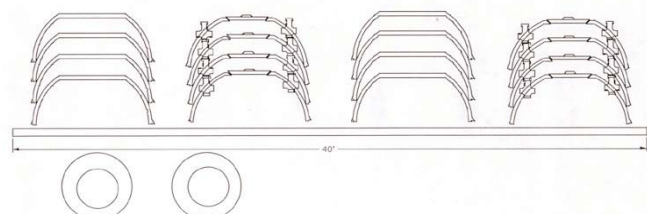

Important: As an additional incentive we offer a generous "**MANAGEMENT FEE**" to oversee our business interest. This fee will be payable for each tank sent out from the production site.

Please contact me at: **(250) 863-8372** to let me know you have received this and to find out more details about this opportunity. If this opportunity does not fit your business, you may know of someone local who would use **your concrete** to make our products on a contract basis.

Handling Methods

Regular Deck Truckload of Tanks

Best regards,

Jim Ripley (250) 863-8372
